RFP Change Notice No. 4

IT Infrastructure Rebuild · Data Center Colocation Project

October 12, 2026

Under Chapter 1 Section D.4) of the NHSV IT Infrastructure Rebuild · Data Center Colocation RFP, this notice forms part of the RFP, and where it differs from the main text, this notice prevails. It is issued in Korean and English editions; where they differ in meaning, the Korean edition prevails.

Issued by	NH Securities Vietnam (NHSV)
Department	IT Division

Email	jeongms@nhsv.vn (Point of contact: IT Team)

1. Notice summary

Item	Detail
Project	NHSV IT Infrastructure Rebuild · Data Center Colocation Project
To	All participating bidders
From	NH Securities Vietnam, IT Team
Date	October 12, 2026
Basis	[RFP] Chapter 1 Section D.4). This notice forms part of the RFP and has the same force as the main text. Where the two differ, this notice prevails (Chapter 1 Section G.2)).
Proposal deadline	Unchanged (Wednesday, October 14, 2026, 17:00)
Files	The RFP files are not reissued. Please continue to use the RFP files distributed after signing of the NDA from September 28, and Change Notices No. 1, No. 2 and No. 3.

2. Reason for the change

[RFP] Chapter 2 Section C provides that the three scope areas are, as a rule, awarded under a single contract, and Change Notice No. 2 requires the Bidder to structure delivery of the project, including the external circuits, in line with applicable law and the rules of the connected institutions. However, [RFP] Chapter 2 Section C.1) and Chapter 11 Section C.3), [Technical Volume] Chapter 5 Section J, and the note at the head of Section C and note 5 of [Annex 2] state that even a bidder for scope area ③ (external circuits) may mark some circuits "cross-connect" or "not available", leave the circuit service fee out of its quotation, and leave NHSV to contract those circuits directly with the carrier. This does not match the principle above. So that every bidder quotes the same scope, a bidder for scope area ③ supplies all 18 circuits as the contracting party, as set out below. The treatment of a bid that does not cover scope area ③ ([Annex 2] note 9, normalization to a common scope in [RFP] Chapter 11 Section C.3), and item 4 of Chapter 11 Section D) and the boundary for circuit entry cabling are unchanged.

3. Changes

Change 1. The 8 designated circuits ([RFP] Chapter 2 Section C.1))

Amend the first sentence of the second bullet of Chapter 2 Section C.1). The rest of that bullet (how to enter the fiber-core charge and one-off costs) is unchanged.

- Before: Where it cannot, mark the item "not available" in [Annex 2] and state every cost the Bidder incurs to bring that circuit into its data center.
- After: Even where it cannot, a bidder for scope area ③ includes the circuit in this contract and supplies it as the contracting party. The Bidder structures that supply under Chapter 2 Section C.5) in line with applicable law and the rules of the connected institutions (for a consortium, Chapter 2 Section C.4)), and NHSV does not contract for the circuit separately with the carrier outside this proposal. A bidder that does not bid for scope area ③ (for example, one bidding for colocation only) marks the item "not available" in [Annex 2] and states every cost the Bidder incurs to bring that circuit into its data center.

Change 2. Price comparison of the circuit items ([RFP] Chapter 11 Section C.3))

Amend the text of the bullet "Normalizing the circuit items" in Chapter 11 Section C.3) as follows. The last two sentences of that bullet (when the reference value is fixed, and the basis attached to the evaluation file) are unchanged.

- Before: the scope quoted for circuits depends on how they are provided. "Own circuit" includes the full circuit service fee; "cross-connect" includes only the fiber-core charge, because NHSV contracts the circuit service directly with the carrier. For any section answered as "cross-connect" or "not available", NHSV therefore adds the circuit service fee it bears separately, on the same reference basis for every bidder, before comparing.
- After: a proposal covering scope area ③ includes the circuit service fee for all 18 circuits, whether a circuit is answered as "own circuit" or "cross-connect". Where such a proposal marks a circuit "not available" or leaves its circuit service fee out, NHSV treats that section as a deviation from the specifications, reflects it under "Compliance with the specifications" in Section C.2) of this chapter, and adds the same reference value for

every bidder before comparing prices. NHSV still does not contract for that circuit separately with the carrier outside this proposal, and the Bidder must set out in writing, at the preferred-bidder negotiation stage, how it will supply that circuit as the contracting party.

Change 3. Circuit requirements table ([Technical Volume] Chapter 5 Section J)

(1) Row "How each segment is provided"

- Before: For each segment, answer "own circuit", "cross-connect", or "not available"
- After: For each segment, answer "own circuit", "cross-connect", or "not available". A bidder for scope area ③ does not use "not available", and a "cross-connect" segment also includes the full circuit service fee (the note at the head of Section C of [Annex 2])

(2) Row "The 8 designated circuits"

- Replace "State whether you can supply them as a reseller. If you cannot," with "State how you will supply them (a bidder for scope area ③ includes them in this contract and supplies them; [RFP] Chapter 2 Section C.1)). If you do not bid for scope area ③ and mark them "not available";". The entry method that follows is unchanged.

Change 4. How circuits are provided and what the monthly rate covers ([Annex 2], the note at the head of Section C)

The wording changed by Change 7 (3) of Change Notice No. 1 stays as it is. Amend the following sentences on how circuits are provided and what the monthly rate covers.

- Before: If you supply the circuit yourself, mark "Own circuit" in the Provided? column; if it belongs to another carrier, mark "Cross-connect". What the monthly rate must cover depends on that method. For "Own circuit", enter the full circuit service charge. For "Cross-connect", enter the fiber-core rental only — in that case we contract for the circuit service directly with the carrier concerned, so exclude it from your quotation. In either case, state in Remarks how the circuit service charge and the fiber-core rental are split.
- After: If the circuit is on your own network, mark "Own circuit" in the Provided? column; if you supply another carrier's circuit and bring it into the data center by cross-connect,

mark "Cross-connect". Under either method, enter the full circuit service charge in the monthly rate, add any fiber-core rental you incur, and state in Remarks how the two are split. If you bid for scope area ③ (external circuits), you supply all 18 circuits as the contracting party, and we do not contract for circuit service separately with any carrier outside this proposal. You structure the supply of other carriers' circuits, including through a consortium, under [RFP] Chapter 2 Sections C.4) and C.5) (Change Notices No. 2 and No. 3). Where you do not bid for scope area ③ (for example, when bidding for colocation only), follow notes 5 and 9.

Change 5. Marking "Not available" ([Annex 2] note 5)

- Before: We will procure those items ourselves; this will not count against your proposal.
- After: This will not count against your proposal. If you bid for scope area ③, however, do not mark any circuit item (6 to 23) "Not available"; supply all of them (the note at the head of Section C). A circuit marked "Not available" in a bid for scope area ③ is treated under "Normalizing the circuit items" in [RFP] Chapter 11 Section C.3).

4. Other matters

- Everything in the RFP, Annexes and Forms that this notice and Change Notices No. 1, No. 2 and No. 3 do not change remains as it is.
- The deadline for questions closed on Wednesday, October 7.
